File Header and Trailer

Each file shall begin and end with the same with the same header and trailer layout as below:

Header record layout:

- "BOF SENSITIVE "
- YYYYMMDD
- YYYYMMDD
- Record count always zeros 9999999
- Sequence number 9999999
- Example—BOF SENSITIVE 20150911 20150911 0003861 0005253

Trailer record layout:

- "EOF SENSITIVE "
- YYYYMMDD
- YYYYMMDD
- Record count always zeros 9999999
- Sequence number 9999999
- Example— EOF SENSITIVE 20150911 20150911 0003861 0005253

Repeating Field (Counter) Strings

SAM Extracts contain several instances of counters working in relation to repeating value fields, such as Business Types, NAICS codes, and Product and Service Codes (PSCs).

The counter will read "0000" followed by an empty string if there are no codes of that type for the entity. Where the counter is 0001 or greater, the codes will be disseminated consecutively in one string with a ~ (tilde) separating each code or code group in the string.

Business Type String

31	BUSINESS TYPE COUNTER	Numeric	4
32	BUSINESS TYPE STRING Hold the string of business type codes, the number codes corresponding to the BUSINESS TYPE COUNTER	~ Separated	220

Breakdown of the string and example below:

Position 1 = Business Type Code == "8W", "A7", "A8"

For a full listing of Business Type Codes, please refer to the SAM Functional Data Dictionary.

NAICS Code String

35	NAICS CODE COUNTER	Numeric	4
36	NAICS CODE STRING Holds the string of NAICS codes, the number of codes corresponding to the NAICS CODE COUNTER	~ Separated	12000

NAICS CODE STRING: Repeat X times to correspond with counter. The letter next to the NAICS code is the Small Business indicator (Y/N/E).

Please note: The following NAICS codes are not used for Federal procurement purposes, therefore do not have an SBA-established small business size standard. There will be no Y/N/E answer for the small business status associated with the NAICS codes below. These NAICS codes will be sent with a blank space " " in place of the Y/N/E answer:

112130, 521110, 541120, 551114, 814110, 921110, 921120, 921130, 921140, 921150, 921190, 922110, 922120, 922130, 922140, 922150, 922160, 922190, 923110, 923120, 923130, 923140, 924110, 924120, 925110, 925120, 926110, 926120, 926130, 926140, 926150, 927110, 928110

Breakdown of the string and example below:

```
"... ~237990N~541340N~ ..."

Position1 = NAICS Code == "237990", "541340"

Position2 = Small Business Indication == "N", "N"
```

PSC Code String

37	PSC CODE COUNTER	Numeric	4
38	PSC CODE STRING Holds the string of PSC codes, the number of codes corresponding to the PSC CODE COUNTER	~ Separated	2500

PSC CODE STRING: Repeat X times to correspond with counter.

```
Breakdown of the string and example below:
```

```
"... ~Y159~Y161~Y162~Y163~Y179~Y222~Z200~Z300~ ..."

Position1 = PSC Code == "Y159", "Y161", "Y162", "Y163", "Y179", "Y222", "Z200", "Z300"
```

NAICS Exception String

271	NAICS EXCEPTION COUNTER	Numeric	4
272	NAICS EXCEPTION STRING Holds the string of NAICS exceptions, the number of codes corresponding to the NAICS EXCEPTION COUNTER	~ Separated	1100

There are 13 NAICS codes with possible size exceptions. And there are from two to four exceptions for each of these NAICS codes. The first 6 digits (1st position) of NAICS EXCEPTIONS is the NAICS code, followed by a 'Y', 'N' or NULL in each of the next four positions. Note that in this string a NULL value is denoted by a space rather than the word "NULL". The values of the string are outlined below within the quotation marks. Breakdown of the string and example below:

```
"... ~115310YN ~541330NYY ~ ..."

Position1 = NAICS Code == "115310", "541330"

Position2 = NAICS Exception 1 == "Y", "N"

Position3 = NAICS Exception 1 == "N", "Y"

Position4 = NAICS Exception 1 == NULL " ", "Y"

Position5 = NAICS Exception 1 == NULL " ", NULL " "
```

The NAICS Exception string is utilized when one of the NAICS Codes in the table to the left is used. When one of these NAICS Codes is present, the NAICS String will have an "E" rather than the normal "Y" or "N" response. This is to direct the user to look at the NAICS Exception String. Every NAICS Code that has an exception has between 1 and 4 exceptions, as outlined in the table.

The first exception (1) is always the Y/N answer General Base NAICS Business Size standard. This is the Y/N answer that would have been in the NAICS String, had the NAICS not have been an Exception NAICS. The remaining exceptions are the exceptions for the specific industry sectors.

SBA Business Types String

275	SBA BUSINESS TYPES COUNTER	Numeric	4
276	SBA BUSINESS TYPES STRING Holds the string of SBA business type codes, the number of codes corresponding to the SBA BUSINESS TYPES COUNTER	~ Separated	125

SBA Certification String: Holds X program participation and expiration dates to correspond to the counter. The first 2 positions of SBA Certifications is an SBA Business Code followed by an expiration date in YYYYMMDD format.

Breakdown of the string and example below:

"...~A620210101~XX20210102~..."

Position1 = Business Type Code == "A6", "XX"

Position2 = SBA Cert Expiration Date == "20210101", "20210102"

The possible SBA Small Business types are below:

Business Type Code	Business Type Name
A6	SBA Certified 8A Program Participant
JT	SBA Certified 8A Joint Venture
XX	SBA Certified HUBZone Firm

SAM Numerics Code String

277	SAM NUMERICS COUNTER	Numeric	4
278	SAM NUMERICS CODE STRING Holds the string of SAM Numerics values, the number of codes corresponding to the SAM NUMERICS COUNTER	~ Separated	1600

SAM NUMERICS CODE STRING: Holds X related 'Metrics' groups.

Breakdown of the string and example below:

```
"...~BL^30000000^15000000^300000000^15000000~LS^42^5000000^00^0~PG^1^0^00~..."
```

The first 2 positions of SAM Numerics is a numeric identification code, followed by a set of '^' delimited numbers that fill four positions.

Position1 = Code Type == "BL", "LS", "PG"

Position2 = Value for Sequence #1 == "30000000", "42", "1" Position3 = Value for Sequence #2 == "15000000", "42", "0"

Position4 = Value for Sequence #3 == "30000000", "42", "0"

LS1 = Local Avg. Number of Employees

1239 = Location Employees Value

BK1 = Total Assets from 4th qtr, preceding year

220000 = Total Assets Value

SAM Numerics codes, sequence values, and descriptions are below:

CODE_TYPE	Sequence Number	Description
LS	Local Size numbers	
LS	1	Local Avg. Number of Employees (max. 999,999)
LS	2	Local Avg. Annual Revenue (max. 999,999,999,999)
LS	3	Not Used
LS	4	Not Used
ВК	SBA NAICS	Banking Size Addl data
ВК	1	Total Assets from 4th qtr, preceding year
ВК	2	Not Used
ВК	3	Not Used
BK	4	Not Used
PG	SBA NAICS Power Gen. Addl data	
PG	1	Total MWH, preceding fiscal year, all affiliates
PG	2	Not Used
PG	3	Not Used
PG	4	Not Used
PT	SBA NAICS Petroleum Addl data	
PT	1	Bbl/day, Oper. Atmos. Crude Oil Distil. capacity
PT	2	Not Used
PT	3	Not Used
PT	4	Not Used
BL	Bonding Levels for Disaster Relief Registry	
BL	1	Construction Bonding Level, Per Contract (dollars)
BL	2	Construction Bonding Level, Aggregate (dollars)
BL	3	Service Bonding Level, Per Contract (dollars)
BL	4	Service Bonding Level, Aggregate (dollars)

Disaster Response String

280	DISASTER RESPONSE COUNTER	Numeric	4
281	DISASTER RESPONSE STRING Holds the string of disaster response area serviced codes and area code value groups corresponding to the DISASTER RESPONSE COUNTER	~ Separated	75

The first three positions of a Disaster Response string entry represent an area serviced code, followed by an area code. State area codes are two positions, County area codes are five positions and Metropolitan Service Area codes are four positions. An area serviced code of "ANY" will not be followed by an area code.

Breakdown of the string and example below:

"CTYFL051~CTYFL085~CTYFL099~MSA2700~MSA2710~MSA8960~STAFL"

Position1 = Type Code == "CTY", "CTY", "CTY", "MSA", "MSA", "MSA", "STA" Position2 = Area Code == "FL051", "FL085", "FL099", "2700", "2710", "8960", "FL"

CTY = County code

FL051 = Pasco

FL085 = Sarasota

FL099 = Fairfield

MSA = Metropolitan Service Area code

2700 = Fort Myers-Cape Coral, FL

2710 = Fort Pierce-Port St Lucie, FL

8960 = West Palm Beach-Boca Raton, FL

STA = State code

FL = Florida (Per STATE_List.csv)

The list of Area Serviced Codes (the first 3 fields of a Disaster response entry) are below:

Type Code	Type Description
ANY	Any area
STA	State
CTY	County
MSA	Metropolitan Service Area
